to build
a better
future.

Financial Report
Q3 | 2022

Highlights Q3

In the first nine months of the year, the Group's outstanding loans increased by 6% (10 714 Bn NOK) compared to Q4 2021. The main driver for the increase is strong performance of auto portfolio sales in all Nordic markets, especially in the Swedish and Norwegian markets.

The Group's new lending has increased with 6% in the first nine months of the year compared to the same period in 2021. The increase is driven by strong Auto sales, which is up 7% compared to the first nine months of 2021, especially in the used cars and private leasing segment. Unsecured sales in the nine months of 2022 are in line with 2021 numbers.

Net interest income decreased with 4% in September YTD 2022 compared to the same period in 2021. The main driver is the significant increase in XIBOR rates in all our four markets that have increased the cost of funds compared to last year.

Net impairment losses improved by 308 MM NOK compared to September YTD 2021, explanations are changes in product mix and better underlying customer performance due to better underwriting.

The Group's profit before tax is 2 382 MM NOK as of September YTD, an increase of 1% compared to the same period last year.

A trusted partner in uncertain times

Every day we proudly serve 1.6 million customers across the four Nordic countries. We follow our principles of being Simple, Personal, and Fair, with the purpose of making people and businesses prosper. Our aim is to be the best open financial services platform by acting responsibly and earning the lasting loyalty of our people, customers, shareholders, and communities.

As we were coming to the end of the restrictions due to the COVID-19 pandemic, many experts predicted that we were moving into the new "golden twenties" of economic boom. As we move past the third quarter of 2022, we find ourselves in a very different environment. There is war in Europe, shortage of raw-materials, and severe delay in deliveries of key components. Many countries face a cost-of-living crisis that includes higher interest rates, energy-, fuel-, and food-prices.

Although we are better positioned in the Nordic region, people are feeling the same effects and many face difficult choices in their personal economy. As an example, more than four out of ten Norwegians say that they are more worried about the economy now than before, according to a recent survey from Santander.

“ Although we are better positioned in the Nordic region, people are feeling the same effects and many face difficult choices in their personal economy.

At Santander, we are monitoring the situation closely and want to inform our customers on what they can do to best meet this unpredictable economic situation we are experiencing.

We are simultaneously dedicated to our responsible banking agenda and to be a part of the solution of our biggest challenges. Recently we published our inaugural sustainability report. It demonstrates how we work and operate in a responsible and sustainable way. This quarter we launched a new energy loan for homeowners in Denmark. With our energy calculator, consumers can get advice on energy saving in their home and receive an energy report that proposes specific energy renovations. This can help our customers get lower energy bills and reduce their climate footprint.

We are also delighted to see that the green transition from a fossil-based carpark to an electrical one is continuing with full force, and we are proud to play our part.

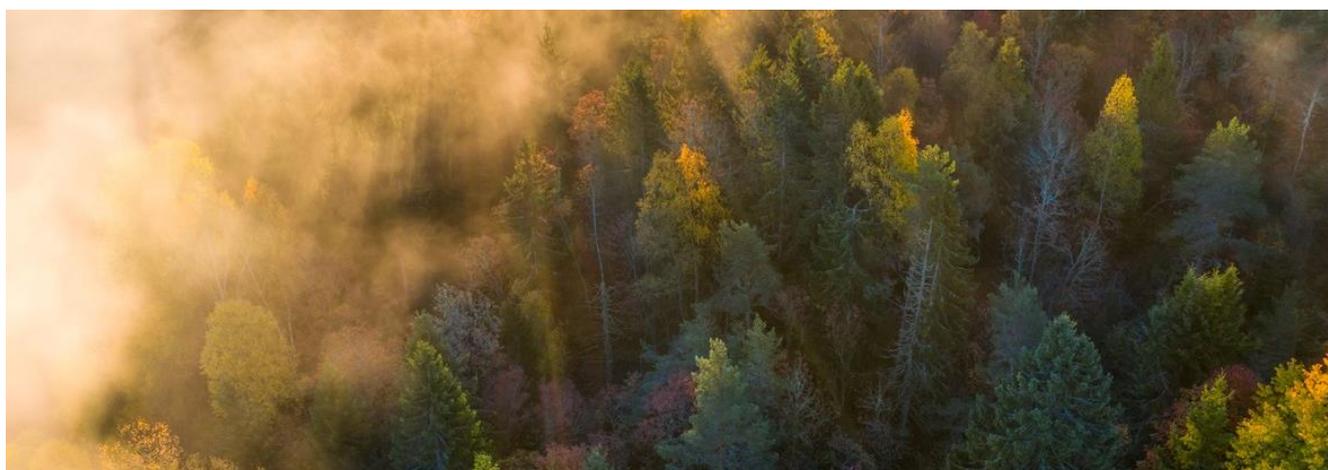

Our Nordic teams are dedicated to serve all our customers and partners in the best way possible. We are drawing on the strengths and experiences in the local markets combined with our global presence to make people and businesses prosper in a responsible way.

* Year on year

Financial performance

FINANCIAL PERFORMANCE FOR THE THIRD QUARTER OF 2022

As of YTD Q3 2022, profit before tax for the Group amounted to 2 382 MM NOK, up by 1% compared to the same time last year. Lower gross margin compared to the same period last year are offset by lower operating expenses and losses.

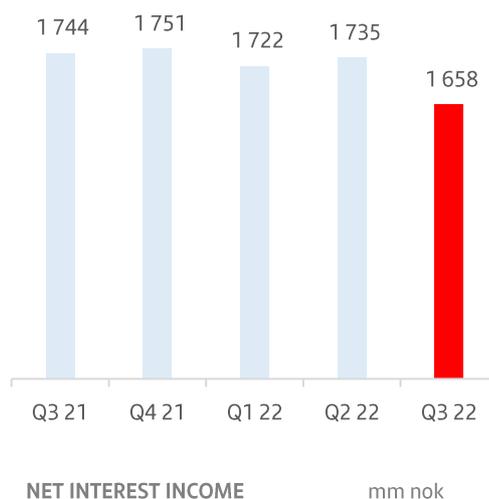

The Group's financial results for September YTD 2022 showed a net interest income of 5 115 MM NOK, representing a decrease of 221 MM NOK compared to the same period last year. The change in net interest income is a result of both lower interest income of 52 MM NOK and increased interest expenses of 169 MM NOK. Of the reduction in interest income, FX and lower net earning assets had a negative impact of 137 MM NOK and 27 MM NOK respectively. This has been offset by increased interest rates with an impact of approximately 118 MM NOK.

The increase in interest expenses is driven by higher funding cost following the significant increase in XIBOR rates (the Interbank Offered Rates in the different countries) in all markets compared to last year.

As of the third quarter, the Group had a loss due to open FX positions of 16 MM NOK YTD compared to a gain of 40 MM NOK YTD Q3 last year. The change in loss is mainly due to losses from swaps in Sweden and Finland and offset by a weaker NOK.

Operating expenses for the third quarter were 2 063 MM NOK YTD, compared to 2 169 MM NOK YTD 2021. The decrease of 106 MM NOK is mainly driven by continued focus on cost control, a one-off VAT true up in Finland and running a more efficient bank.

Net impairment losses improved by 308 MM NOK compared to September YTD 2021, explanations are changes in product mix and better underlying customer performance due to better underwriting.

Loans and deposits performance

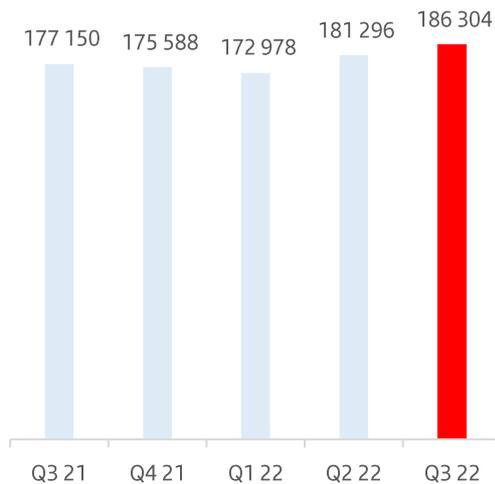

LOANS TO CUSTOMERS

The Group's outstanding loans to customers were 186.3 Bn NOK in Q3 2022, an increase of 6% (10.7 Bn NOK) compared to Q4 2021. This is mainly driven by an increase in the Swedish and Norwegian auto portfolio.

AUTO AND LEISURE FINANCING

The Group maintains its position as market leader in the Nordic auto finance market with a strong focus on partnerships with dealers and importers.

In 2022, sales of new cars have reached 554 307 units (private car (PC) and light commercial vehicle (LCV)) in the Nordic markets, a decline of 14.0% compared to 2021. Used car sales decreased by 2.7% to 2 206 157 units compared to the previous year. In total, the car sales have decreased 5.2%, but with major variations between the countries as well as between share of new and used cars.

The demand for Hybrid and Electric vehicles (EV) continues to rise.

Rising inflation, ongoing war in Ukraine, and indications of a recession all signal uncertainty in the market and postponement of major purchases by consumers.

Financing the green shift

The Corporate Average Fuel Efficiency regulations (CAFE) have come into effect in 2021, penalizing manufacturers with a higher average CO2 emission.

To meet the requirements, manufacturers increased production and registration of cars with a zero and low CO2 emission, especially in markets with higher demand for EVs (including Norway and Sweden).

Most manufacturers prioritize the vehicles with low emissions to meet requirements and send higher emission vehicles to their most profitable markets, therefore reducing supply in low profit markets (such as Denmark). A major push at the end of 2021 decreased the supply in the first months of 2022. Dealer stocks for most brands are increasing slightly after earlier record low levels, now positively impacting the Wholesale Financing opportunities for the Group.

The acceleration of EV and Hybrid car adoption in the Nordic market will continue where the Norwegian market leads with an EV share around 80%, and the changes in the other markets are remarkable: In recent months, Sweden's EV share is nearing 30%, and the share in Denmark and Finland is between 15-20%. So far in 2022, 41% of all new cars financed by the Group are EVs, 30% are hybrids. Finance penetration is significantly higher for EVs than for non-EVs, helped by the strong partnerships the Group has across the region.

The Nordic market

The Swedish market, which is the largest in the Nordic, has a growing share of EV and Hybrids, both combined making up 60% of the market (EV 28%) in 2022. The total new car sales are down by 12.4%. For used car sales the market is down by 6.5%. Used car sales in September saw a remarkable growth of 17.0% in a single month. The Swedish market is characterized by growing EV and Hybrid sales. On the financing side, the Group is the market leader in Private Lease year to date (YTD).

In the Norwegian market, sales grew strongly in 2021, and there has been a significant drop so far in 2022. New car registration is down by 20.1%. The EU regulation caused many manufacturers to increase their efforts in one of Europe's largest EV markets and push sales in December 2021, leading to a further supply constraint in 2022. An increasing number of new car brands are entering the Norwegian market. Used car sales is down by 1.1%, not impacted by the earlier new car sales push. Growth in used car sales has been recorded as recent as September 2022, and at the same time, the Group improved the financing share of used cars.

In the Danish market, sales increased by 2.3% for used vehicles and decreased by 11.7% for new vehicles. Denmark is the only Nordic market where Diesel cars still have a notable presence, although rapidly declining as well. The share of EV and Hybrid vehicles combined increased to about 35%. The profit margins in the Danish market for original equipment manufacturers (OEM) remain low, and other markets continue to be prioritized. The relative share of financing by the Group increased for both new and used vehicles. The share of private lease is increasing in the market, where the Group has an excellent position, having been awarded Best Leasing company more than once in recent years by Auto Awards.

The Finnish market saw a decrease in new car sales of 11.2%, recovering from an earlier steeper decline. September in isolation saw a 11.0% growth. New (mostly Chinese) entrants choose Norway or Sweden over Finland, and little activity is seen by new players. In used car registration a decrease of 2.2% was recorded. Rising costs, high car prices, and uncertainty reduce consumer spending. The EV and Mild/Hybrid vehicles make up 88% of car registrations in 2022.

The Nordic market leader

Finance has become a more integrated part of the car sales offer in terms of finance bundled with services such as insurance, maintenance, and other relevant products. This trend is expected to continue with more flexible "mobility" models, including flexible finance periods and the possibility to trade in and exchange cars based on an agreed residual value.

The competition has increased, with parties such as leasing companies entering car financing in different market segments, putting pressure on the margins. The Group has a strong position as market leader in the Nordic auto finance market. The main focus is on partnerships with dealers and importers and OEM-owned national sales companies. Important partnerships have been renewed and the Group's streamlined operations and processes protect margins and increase focus on market developments.

Overall, in the Nordics, the Group is the market leader with top 3 positions in each of the markets.

#1 market leader
In the Nordic auto
finance market

Total gross outstanding on auto financing is 156 050 MM NOK, an increase of 8.6% compared to December 2021.

Future expectations

The impact of the new emission target for car sales in Europe will continue to be significant. To avoid large penalties, the OEMs must reach lower average emission targets each year. The manufacturers continue to invest in new technology, consolidate, and create partnerships between brands.

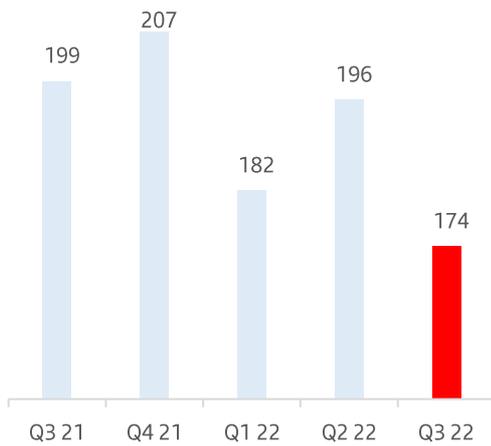

The demand for low emission cars continues to increase in all markets, supported by increased governmental incentives, for example revised taxation being more focused towards low emission vehicles. An exception will be Norway, which continues to phase out tax and other incentives on EV cars.

Increased regulations and rising energy costs continue to impact car sales. The war in Ukraine has created uncertainty and will impact economic growth negatively throughout the region. Supply is recovering, but demand is cooling off. The brands have built order banks, which will need to be fulfilled. Some smaller manufacturers will choose to exit from certain markets and sell importerships to private importers or exit completely. At the same time there is an opportunity for car brands, such as Chinese brands entering the Nordic market, purely focused on EV cars.

In car finance, demand for bundled products will continue, but the mobility solutions growth is delayed as consumer behavior has changed. In the largest cities, increased focus from the governments on reducing car traffic and providing incentives for other mobility solutions, such as car sharing and public transportation, is expected.

OEMs are expected to grow their online presence, enabling customers to order cars and car related services online. Dealer relationships will change when alternative distribution models are implemented, and the agent model is gaining traction. The Group will support partners during this transformation and integrate financial solutions into their web platform.

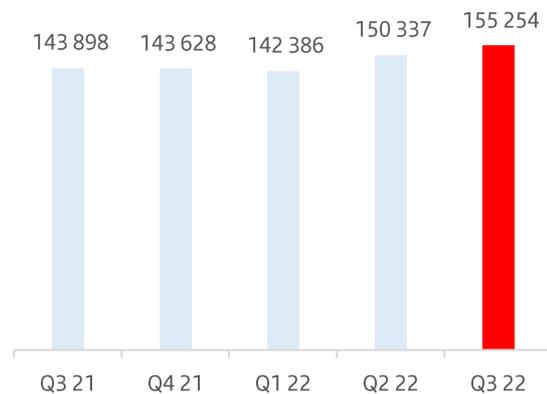

The Group has a strong position in the Nordic market and will further strengthen this position with its existing partnerships. Key Nordic partnerships are being extended throughout 2022, which underlines the Group's strong foundation within car financing.

SALES OF NEW CARS (PC AND LCV*)

Units in thousands (Market in total)

GROSS AUTO FINANCING

mm nok

UNSECURED LENDING

The Group's unsecured lending-portfolio consists of Consumer Loans, Sales Finance & Durables and Cards & payment. Consumer Loans remains the main unsecured financing product.

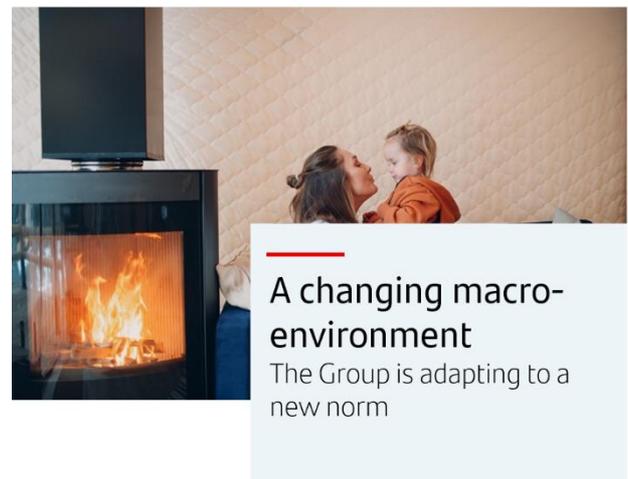

Consumer Loans

The Group's Consumer Loans portfolio in Q3 2022 has decreased by -3.4% in outstanding volumes compared to Q4 2021. The Swedish Market is still the lead shareholder of the total Consumer Loan portfolio with 51% of the total Nordic Market and observed a decrease of -7.7% vs Q4 2021 (Norway -15.6%, Denmark 7.6%, and Finland 5.6%).

The Group's Consumer Loans sales decreased by -5.3% in Q3 2022 compared to Q4 2021, mainly driven by lower sales in Sweden, partly offset by higher sales in Norway and Denmark.

The Group has been focusing on adapting to changing market dynamics so far this year, during the last quarter especially on increased funding costs and challenging macro-economic factors. Sales in the Danish, Finnish, and Norwegian market are still relatively stable. The Swedish market is continuing to drop, primarily driven by lack of certain features in the product offerings connected to debt consolidation.

The shift towards debt-consolidation in the market gives the Group a direct negative impact on sales without certain competitive features offered, like optimized competitive tenors, amount, and pricing. Across the region, debt consolidation is continuing to increase rapidly in all markets. The need for optimized processes and underwriting together with improved customer journeys are getting more important month by month.

A changing macro-environment

The Group is adapting to a new norm

With inflation remaining at a heightened level and continuous interest rate increases in all markets, the Group is adapting to a new standard with higher costs of funds. The Group has done several adjustments across the region to secure profitability on both new business and portfolio and has solid plans in place on how to navigate going forward in an unpredictable macro environment.

Adjusting to tightening regulations

Additional tightening in the regulatory landscape related to credit worthiness and affordability increases the competition even further in the region.

During Q3, the Group finalized the last migration of Consumer Loans core systems in the region and by that also strengthened the ability to change and reduce time to market on commercial initiatives going forward.

Sales Finance & Durables

The Nordic Sales Finance portfolio is up by 3.9% in Q3 2022 compared to Q4 2021, mainly driven by an increasing portfolio on Durables in Denmark and Finland within the green financing segments (26.2%). This is offset by a decrease on Sales Finance and Durables in Norway and Sweden (-6.2%), markets that hold 62% of the total Nordic Sales Finance portfolio.

E-commerce has slowed down due to turmoil globally but, in a long-term perspective, still holds several customer benefits in its value proposition. Market outlook expectations for Sales Finance is stable, however expectations are that customers will be more selective with purchases going forward.

The focus on growing the green energy financing sector continues. There is potential to grow in the whole region, especially within the solar panel and heat pump segments to further strengthen the position within the environmental, social, and governance (ESG) areas to deliver on the Group's Responsible Banking agenda.

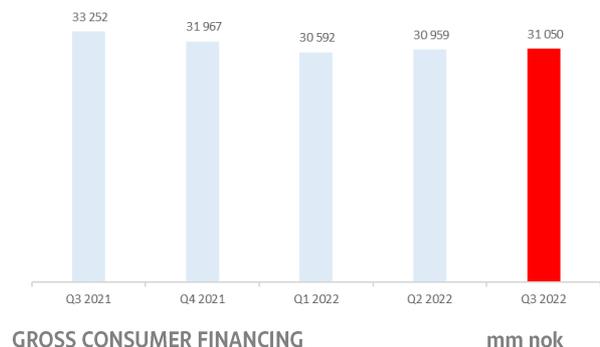

Cards & payments

The Group's Credit Card portfolio has decreased by -6.2% in Q3 2022 compared to Q4 2021. The Norwegian portfolio, which represents 74% of the total Nordic Credit Card portfolio, decreased by -8.4%, while the Group observed a decrease of -5.5% in Sweden.

Use of cards post COVID-19 is up and there is a strong performance in new business volumes. The portfolio however is decreasing due to the market-trend related to debt consolidation. With an unpredictable macro environment, increased electricity bills, and interest rates, customers are consolidating loans and outstanding credit card balances to reduce monthly costs. This results in a direct hit on the Group's outstanding cards portfolio.

The Group is dedicated to renew and improve the value proposition for Cards in the region going forward, improving card payment infrastructure with advanced data analytics to create more tailored customer experiences. A complete rollout of all the Big Pays like Apple and Google Pay are scheduled for remaining countries, and capabilities around these are being enhanced. For the Danish market, new login and signing services are being improved, built, and scheduled to be implemented in the next months to come.

The Group continues the journey of improving capabilities, adjusting customer value proposition, adding product features, whilst securing compliance.

DEPOSITS

As volumes adjusted downwards from the peak reached during the pandemic, the focus going forward is stable growth in deposits in line with asset growth. Strong cost management and improving the customer experience remain high priorities.

1%
Increase

Managing balances in a changing market

With a changing macroenvironment due to high inflation and increasing interest rates, the Group will look to ensure deposits continue as the primary funding source. As volumes in 2021 adjusted downwards from the peak reached during the pandemic, the focus going forward is stable growth in deposits in line with asset growth. Strong cost management and improving the customer experience remain high priorities.

Total outstanding volumes for the Group is 74 079 MM NOK as of Q3 2022, representing an increase of 775 MM NOK (1%) compared to Q4 2021. The Group operates deposit platforms in three of its four home markets: Denmark, Norway, and Sweden.

Volumes in the Danish market represent the largest share of deposits within the three markets. Outstanding balances as of Q3 2022 were 30 213 MM NOK, ending the quarter 3% higher than Q4 2021. However, this increase is due to the depreciation of the NOK compared to DKK. In 2020, the Group closed the Danish deposit products to new customers to maintain balances at current levels. The high level of balances reflects the dynamics in the Danish deposit market where the Group has been one of the few banks offering non-negative yields. In Q3 2022, all products were re-opened for new customers.

In the Danish market, a demand product, a notification product, and a fixed term product are offered. The notification product requires customers to notify any withdrawals 31 days in advance of the actual withdrawal.

In the Norwegian market, a notification product was launched in Q3 2021 to complement its demand product offering and to align its product offerings with the Swedish and Danish markets. At the same time, Norway also introduced a tiered structure to its pricing model to manage pricing competitively and to reward small savers. In the Norwegian market, there was an outstanding balance of 23 185 MM NOK at the end of Q3 2022, representing a 1.7% increase compared to Q4 2021.

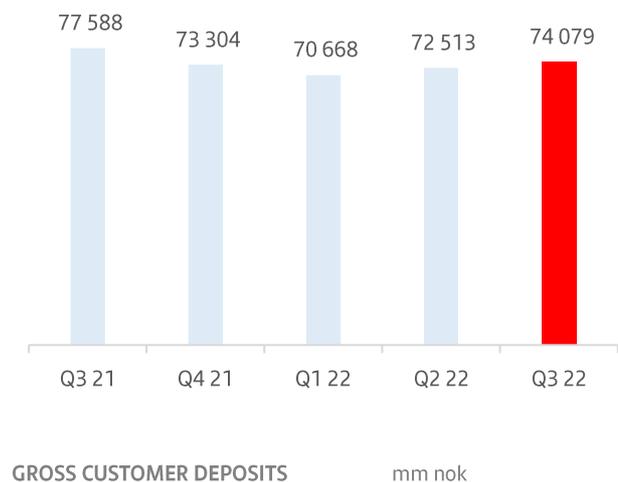

In the Swedish market, both a demand product and a notification product is offered. In addition, the market has an ongoing cooperation with a partner.

While the Group's strategy is focused on building its in-house products, the cooperation provides additional flexibility for managing the Swedish deposits portfolio. Outstanding volumes in the Swedish market stood at 20 682 MM NOK at the end of Q3 2022, which is approximately 2.4% lower compared to Q4 2021.

Helping people prosper

The Group continues to focus on improving the customer experience through the optimization of mobile responsive onboarding solutions, net banks, apps, and chat bots. In the Danish market, a new Private Netbank and App were launched in 2020. In addition, new features, such as saving goals and the possibility to view personal balances in third party banks, were introduced in the Danish market through the Group's new financial tool named Prosper. The Group will look to roll out similar customer solutions for the Norwegian and Swedish platforms.

The Bank is a member of the Norwegian Banks' Guarantee Fund. Customer Deposits are covered according to the local guarantee limits, providing our Deposits customers a guaranteed amount per debtor of 100 000 EUR in the Danish and Swedish markets and 2 MM NOK in the Norwegian market.

Insurance

The insured customer base continues to grow across the Nordic countries. The COVID-19 pandemic and the macro-situation in Europe has increased the awareness among consumers and partners of the importance of insurance. With insurance income representing 4% of total revenue in 2021, it is firmly positioned as a strategic priority for the Group.

Enhancing digital capabilities

The Group continues to focus on improving the customer experience through the optimization of its current and new products. As the market progresses towards a highly digital customer journey, the Group has decided to ramp up the internal IT capabilities over the next 3 years to cater for new digital products as well as to decrease the time to market for the Group's products and services. This is expected to translate into increased sustainable insurance revenue for the Group.

New product for auto leasing in the Swedish market

Looking at the Swedish private leasing market, the Group identified the potential for launching a dedicated collateral protection insurance (CPI) product for leasing, which was launched at the end of 2021. As a result of the CPI for auto leasing, the current conversion rate has increased to more than 35% on new contracts, which greatly impact the Group's insurance profitability.

Digital point of sales for the Norwegian market

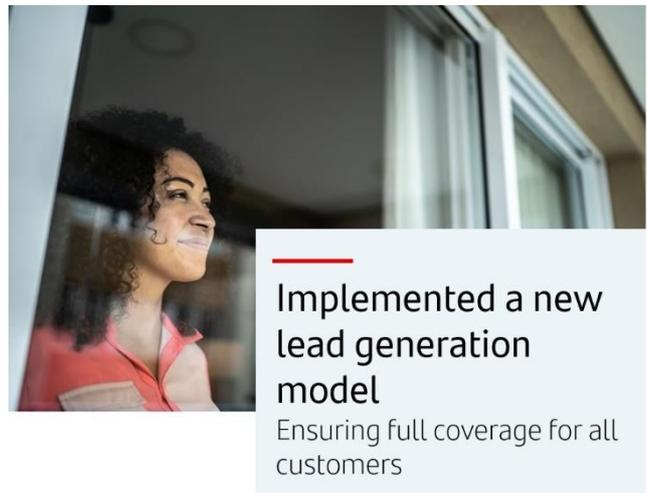

Due to tightening of regulations regarding the implementation of the insurance distribution directive, traditional distribution through the Group's dealer network for auto has become increasingly difficult. As a result, the Group launched a new sales channel for non-certified sales agents called Digital POS on April 1, 2022 in the Norwegian market.

With the implementation of a digital point of sale solution, the Group will ensure that 100% of all auto customers are given a new insurance offer, which will decrease the acquisition cost, thereby making the point of sale channel more profitable.

Digital point of sale in the Finnish market

Historically, the Group has only sold insurance in the Finnish market through telemarketing. In an effort to strengthen the customer experience and improve customer retention, the Group decided to launch a new point of sale solution for the Finnish dealers in 2021.

However, as sales have not proved to be as expected, the Group has decided to implement a digital point of sale solution similar to the one operating in Norway.

Enhanced regulations

The EU Insurance Distribution Directive regulates how insurance is distributed, with a goal of increasing consumer protection. Its main aim is to ensure that customers receive clear and adequate information provided by competent sales professionals. The Norwegian market has already responded to this regulation by adopting either free-start models or digital onboarding.

A sales ban was imposed by the N-FSA, upon request from the D-FSA, on all Norwegian distributors with cross-border services in Denmark in the summer of 2021. The Group therefore had to cease all insurance sales activities in the Danish market during Q3 2021. The Group has since then successfully implemented a new lead generation model, ensuring full coverage possibilities for all the Group's customers. As soon as Norway is registered by the N-FSA as a full insurance intermediary, the N-FSA will send a notification to the D-FSA on the Bank's behalf so that the ban can be lifted, and normal sales can resume once again.

New legislation for telemarketing in the Finnish market

On January 1, 2023 the national telemarketing law in Finland will be tightened. The new bill includes a provision requiring companies to provide their offers to customers in writing, which would effectively end the right of telemarketers to "close" offers by phone. It is expected that this will impact the Group's insurance sales in Finland, but mitigations are being made to ensure a smooth transition.

Risk Management

Our risk management function is underpinned by common principles, a strong risk culture, a solid governance structure, and advanced risk management processes and tools.

Executive Summary Q3 2022 (vs Q2 22)

Credit Risk

Credit quality indicators have maintained the positive trend observed in the previous quarter.

Cost of Credit	NPL Ratio	Coverage Ratio
0.54%	2.69%	99.7%
-4 bps	-24 bps	+318 bps

Structural and Liquidity risk

Robust liquidity buffer with ratios above regulatory limits.

LCR	NSFR
179%	107%
+15 pp	-2 pp

Capital Risk

Capital ratios are above regulatory requirements.

Operational Risk

In light of the ongoing conflict in Ukraine, Risk is focused on business continuity matters. The Group's Operational Risk Losses are mainly driven by external fraud losses.

Macro & geopolitical context

Uncertainty remains high, and it is unclear how the military situation and the countermeasures around the world will play out - in either the shorter or longer term. However, due to the economic impact of the crisis on energy and food markets, disruptions will affect Europe and beyond.

Global growth is expected to remain moderate in the second half of 2022. Inflationary pressures are broadening out beyond food and energy, rapidly raising the cost of living. Central banks have responded increasingly vigorously to above-target inflation by raising interest rates more than initially expected, with a disruptive effect on economic planning, dampening both consumption and investment. Unemployment remains contained at relatively low levels across the Nordics.

The Group closely monitors the macro-economic context and the evolution of the geopolitical situation through specialized working groups for a prompt identification of any risk event or threat that could arise in order to define adequate mitigation actions.

Credit Risk Management

The Group's Credit Risk profile in Q3 2022 remained stable for the total portfolio, in line with business strategy.

Cost of Credit (CoC) improvement compared to Q2 is driven by the portfolio sales timing positively impacting Q3. The consolidated Non-Performing Loans (NPL) Ratio ended at 2.69% (1.43 % for Secured and 9.06 % for Unsecured portfolios) in Q3 2022, compared to 2.93% in Q2 2022 (1.58% for Secured and 9.52% for Unsecured). The total loan loss reserves have decreased slightly

from 5 144 MM NOK per Q2 2022 to 5 020 MM NOK per Q3 2022 which includes increases of 79 MM from the FX-movements. The total reserves as of Q3 2022 of 5 020 MM NOK include 4 950 MM NOK related to loans to customers and 70 MM NOK connected to off-balance exposures. The group maintains its forward-looking "post-COVID" model adjustments divided between specific customer portfolio behaviors holding payment holidays and macroeconomic forward-looking factors.

The post model adjustments include reserves related to payment holiday of 110 MM NOK and forward-looking factor reserves of 81 MM NOK. Payment holidays (PH) reserves are booked to cover the increased risk of losses for customers that cannot deliver on upcoming payments after the PH expired. The macroeconomic forward-looking factors scenario refers to the overall worsening of the macroeconomic indicators that lead to increased losses.

Structural and liquidity risk

Liquidity Risk in the Group is measured using the Liquidity Coverage Ratio (LCR), Net Stable Funding Ratio (NSFR) and Liquidity stress testing. Both LCR and NSFR are regulatory metrics used to measure short and long-term liquidity risk.

The Group has a strong liquidity position, managed at Nordic level to ensure efficient use of liquidity across the Group and the liquidity risk management maintains strong during third quarter of 2022. As of September 2022, the Group's LCR was 179 % and the NSFR was 107%. Both metrics are comfortably exceeding the regulatory requirements. As a result of the war in Ukraine, the financial markets have experienced higher volatilities with elevated spread

levels. Given the strong liquidity position for the Group, there is no immediate need to access the funding markets in the shorter term. The Group also has a credit line with the parent company and can utilize this to manage short term liquidity needs also to the extent external funding might become unavailable or is considered unfavorable for a longer time period.

The Group's balance sheet composition is designed to ensure that interest rate risk is managed at prudent levels and within established limits. The Group's policy is not to actively take on interest rate risk in its operations and continuously monitors the sensitivity of its net interest income (NIM) and equity value (MVE) to changes in interest rates. The exposure to interest changes on both metrics are within defined limits per end of September 2022. As a result of increased inflation globally and across the Nordic geographies, there are expectations for even further central bank hikes in the near to medium term.

Foreign currency risk

The Group is exposed to currency risks through its activities in the Swedish, Danish, and Finnish markets and from funding activities in the Euro-markets. The main source of currency exposures is retained earnings in EUR, which are accumulated in the Finnish subsidiary to meet its solvency targets. The Group minimizes currency risk by ensuring assets are funded by liabilities in the same currency. Accumulated earnings in SEK and DKK are spotted to NOK when needed, to minimize the open exposure. The risk is measured through an FX exposure report, covering all significant currencies for the Group.

The total open currency exposure as of September 2022 was 3 031 MM NOK equivalent for consolidated SEK, DKK, and EUR exposures, which is comfortably inside the defined FX exposure limits for the Group in 2022.

Non-financial risks

The Group defines operational risk as the risk of losses from defects or failures in internal processes, people, systems, or external events. It covers risk categories such as fraud, technological, cyber-risk, legal and conduct risk, however it does not include events arising due to strategic or reputational risk. Operational risk is inherent to all products, activities, processes, and systems. It is generated in all business and support areas. Our operational risk management and control model is based on a continual process of

identifying, evaluating, reporting, and mitigating sources of risk, regardless of whether they have materialized or not, ensuring that risk management priorities are established appropriately.

In September 2021, the Norwegian Financial Supervision Authority (N-FSA) conducted an inspection of The Bank's compliance with the Information and Communication Technology (ICT) and AML/CTF-regulations. The scope of the inspection was our Norwegian business. The report following the inspection, which was published around the closing of this Q3-report, shows weaknesses in the Bank's systems and routines. Based on the report, the N-FSA has imposed an administrative fine on SCB of NOK 150.000.000 and issued corrective orders. The costs arising from this will occur in Q4. The fine is not the result of a suspicion of money laundering in any specific case but relates to deficiencies in the Bank's routines and systems for risk assessments, reporting and follow-up, and control of the customer portfolio.

It is the Bank's utmost priority to rectify these matters. We are working purposefully and are fully committed to close nonconformities discussed in the report as soon as possible. The Bank has decided to accept the fine in order to have a forward leaning focus, not least on continuous improvements of the Bank's AML/CTF-capabilities.

The operational risk focus in 2022 continues to be adequate management of continuity risks due to the situation in Ukraine, as well as bringing attention towards special operational risk areas such as fraud, cyber security, and vendor risk management in relation to monitoring and management of ongoing projects. The ongoing AML improvement initiative continues to be a focus area for the Group and is expected to address, among other things, the quality of change management oversight. In regard to the Group's internal control environment, the work to enhance risk and control identification and assessment has continued as part of the ongoing BAU updates leading to the start of annual certification of Internal Control Model (ICM). The campaign started in September, and its results will be available in January 2023. Overall, the Groups operational risk profile is expected to remain stable throughout 2022.

Funding

The Group continues to pursue a diversified funding strategy. Developments in the markets due to COVID-19 have resulted in a shift towards deposits and some reduction in capital markets funding. Reliance on parent funding remains stable with no increased dependence due to the pandemic.

79%

Self-funding

SELF-FUNDING RATIO

A diversified funding platform

Over the past ten years, the Group has developed multiple funding channels ranging from deposit products across three of its four markets, unsecured bonds in the Norwegian, Danish, Swedish, and European bond markets, including green bonds in the Swedish and Norwegian markets, and securitization transactions with assets from all four Nordic countries. Parent funding provides a buffer where needed. The Group aims to maintain a consistent self-funding strategy, with variations due to seasonal fluctuations and timing of transactions.

Self-funding sources totaled 79% per Q3 2022, with parent company loans providing the remaining 21%. Customer deposits is the largest funding source, comprising 47% of total funding at end of Q3 2022 and has a total outstanding volume of 74 079 MM NOK across the three Nordic markets where the Group is present. Conversely, unsecured issuance has been limited to offset the strong amount of deposits funding. Total outstanding bond and certificate issuance increased in Q3 2022, standing at approximately 35 872 MM NOK or 23% of total funding. Senior unsecured issuance and certificates outstanding end of Q3 2022 include 2 500 MM EUR in the Euro market, 5 250 MM SEK in the Swedish market, and 4 600 MM NOK in the Norwegian market. The Group has scaled back the presence in the certificates of deposits market in Norway and Sweden and currently does not have any outstanding certificates as of end Q3 2022.

The weighted average remaining term to maturity is 2.10 years. This number fluctuates somewhat and typically remains around 2 years.

The Green Bond program

The Group launched its inaugural Green Bond issuance in February 2020, following the publication of the Green Bond Framework in December 2019.

Santander Group has published its updated Green, Social and Sustainability Funding Global Framework. This new Framework substitutes and replaces the previous Green Bond framework from the Group, aligning our structure with the best practices of the ESG / sustainable capital markets.

Ratings

The Group is rated by Fitch (A-/F2/Outlook Stable) and Moody's (A3/P2/Outlook Stable).

Securitizations

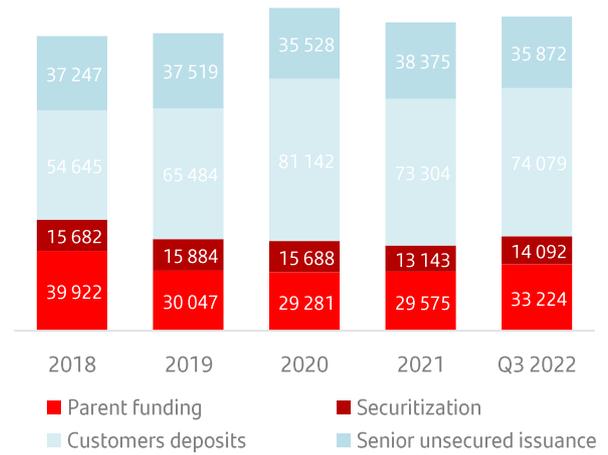

The Group issued its eleventh Auto ABS out of Finland, Kimi 11 on June 1, 2022. The transaction had a total size of 550 MM EUR. Parts of the transaction were retained due to market conditions, but the Group has placed the retained tranches in the secondary market at a later point in time.

Securitization issuance in Norway has been paused due to the change in Norwegian law in 2016. Securitizing the Finnish portfolio, however, remains a consistent source of funding, since SCF OY is not impacted by this regulatory change. As a result, the amount of funding received from the securitization markets has remained stable over the past five years, providing approximately 10% of the Group's funding since 2016. The last Finnish transaction closed in June 2022, with a total issuance size of 550 MM EUR. Total outstanding volumes in securitizations currently equals 14 092 MM NOK.

The Group looks to utilize its securitization capabilities more frequently going forward, once Norwegian legislation is harmonized with the new Securitization Regulation (Regulation (EU) 2017/2402), together with the amendment to the Capital Requirements Regulation (Regulation (EU) 2017/2401). The new Securitization Regulation establishes a standardized framework for securitization and creates a specific framework for simple, transparent, and standardized securitizations. In June 2019, the Norwegian Ministry of Finance (MoF) released a consultation paper on the adoption of the new regulations. In December 2020, the MoF published a proposal to implement the EU Securitization Regulation into Norwegian law, which was approved by the Parliament on March 23, 2021. The legislation awaits the adoption by the EEA, and once incorporated, the Norwegian Securitization legal framework will be aligned with that of other European financial institutions.

Other sources of funding

Loans and drawing rights from the parent bank and companies within Grupo Santander provide any remaining funding needs. These loans are priced at market rates, denominated in the local Nordic currencies and are currently concentrated in the shorter maturities.

FUNDING COMPOSITION

mm nok

Solvency and Capital Adequacy

The Group closed Q3 2022 with a good margin above the minimum regulatory capital requirements. Nordic regulators continued to communicate their expectations on increasing capital requirements through the countercyclical buffer. The Group is well positioned to meet present and future increases in capital requirements.

Capital position

The Group is jointly supervised by the Norwegian FSA and the European Central Bank (together the Joint Supervisory Team) and must comply with capital requirements for banks in Norway both at consolidated level (the Group) and at stand-alone level (SCB AS).

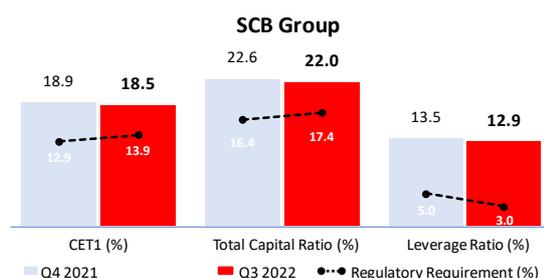

Since December 2018, the Group has elected capital ratios using IFRS9 transitional rules as the official ratios required to meet the minimum capital requirements set forth by regulatory authorities. From Q1 2022 and going forward, the Group is reporting its official capital ratios under the fully loaded approach.

The common equity Tier 1 (CET1) ratio of the Group has decreased from 18.89% per 31.12.21 to 18.48% per 30.09.22. The corresponding numbers for SCB AS point to a slight decrease from 18.34% to 18.14%. The leverage ratios for the Group and SCB AS have also slightly decreased from 13.52% to 12.95% and from 13.84% to 13.26%, respectively.

The drop in CET1 and leverage ratios has been driven by higher risk weighted assets (RWAs) due to portfolio growth and Norwegian kroner weakening versus DKK, SEK and EUR. The increase in RWA has been somewhat mitigated by the implementation of the "Banking Package" in Norway from June 1st, 2022 (extended scope for SME discount factor) and the correction of a data issue in the behavior score for IRB exposures in Finland and Norway from May 2022 reporting.

The Group remains with a solid capital position and has a healthy buffer above capital requirements. The CET1 ratio for the Group was 4.57%-points above the regulatory requirements (including Pillar 2 guidance) per 30.09.22, while SCB AS had a CET1 ratio which was 4.18%-points above the regulatory requirement. The leverage ratios are well above the new regulatory requirement of 3% in force with the implementation of the "Banking Package" in Norway.

Leverage ratio	5.0 %	3.0 %

Current and future capital requirements

Following communications from Nordic regulators, countercyclical buffer requirements ("CCyB") have increased as per September 30, 2022, in both Denmark and Sweden from 0% to 1%. CCyB remained unchanged for Norway (1.5%) and Finland (0%). Going forward, CCyB is expected to keep increasing up to 2.5% in Norway and Denmark by Q1 2023 and to 2% in Sweden by Q2 2023. The Group continuously updates developments on buffer requirements in its capital planning

and is well positioned to meet present and future increases in capital requirements.

Regulatory

The Group uses the advanced IRB-approach for the private auto portfolios in Norway, Sweden, and Finland. In July 2021, the Group submitted updated IRB models to the Joint Supervisory Team, incorporating new regulations and guidelines.

The Group received its MREL requirement from the Norwegian FSA on June 2, 2022, which constitute internal MREL requirements and, as such, are to be satisfied within own funds and eligible liabilities issued or owed to or held by the Parent Company, Santander Consumer Finance, S.A., or Banco Santander, S.A. directly. The deadline to satisfy the full MREL requirement was set to January 1st, 2024.

For further details regarding Capital Adequacy, please see [Note 7] "Capital adequacy".

Regulatory Changes

The regulatory framework for the financial sector is constantly changing and the number of initiatives from regulators continues to be high, both on EU level and nationally. The Group works continuously to ensure compliance and has frameworks to secure monitoring and implementation of new legislation. The Group strives to take on an active role in the public debate and in legislative processes through Finans Norge and other finance associations and networks.

Consumer protection

Consumer protection continues to be an area of high focus from European and Nordic regulators and supervisors.

In Norway, the regulation on sound lending practices is effective until end 2024, however on assignment from the Ministry of Finance, the Financial Supervisory Authority has assessed the need for changes and presented a proposal for amendments, including expanding the area of application for the regulation to certain loans secured with a pledge (such as car loans). The new Norwegian Financial Agreements Act will enter into force January 1, 2023. During Q3, the Ministry of Finance has adopted several new regulations to the Act. Certain transitional rules have also been adopted, amongst others the new Act's provisions on changes to interest rate terms in credit agreements. The new Norwegian Insurance Distribution Act entered into force on July 1, 2022.

The new Norwegian Credit Information Act entered into force July 1, 2022. Additionally, a proposal to expand the debt register to include secured debt (such as car loans and mortgages) has been issued.

On April 5, 2022, a new clause regarding mandatory cash services was adopted in the Norwegian Financial Institutions Regulation. This new clause entered into force October 1, 2022. The Norwegian Ministry of Justice has published a public consultation where the Financial Supervisory Authority proposes to regulate additional benefits and services connected to credits. If this is adopted, financial institutions will not be able to provide additional benefits and services connected to credits, unless they also provide debit solutions to their customers.

Both Norwegian and Swedish Supreme Courts have assessed cases on the consumer's responsibility in case of unauthorized transactions in a consumer-friendly manner. The bank has the burden of proof to verify that the customer has acted in a particularly culpable/reprehensible manner, and the court provides guidance on how this term should be interpreted.

In Finland, there are several proposals for amendments to the consumer protection legislation including changing the

responsibility for supervision of credit institutions from the Regional State Agency (AVI) to the Finnish Financial Supervisory Authority. A new interest rate cap on consumer credits as well as stipulations on marketing have been proposed effective from the spring of 2023, and the Finnish debt register will be launched during the spring of 2024.

Data privacy

Looking at Data Privacy, the European Commission and the United States have announced that they have agreed in principle on a new Trans-Atlantic Data Privacy Framework, which will foster trans-Atlantic data flows and address the concerns raised by the Court of Justice of the European Union in the Schrems II decision of July 2020. The wording and timing of the agreement is yet uncertain and the agreement in principle is to be translated into legal documents.

Countercyclical capital buffer

In March 2022, the Norwegian Central Bank decided that the countercyclical capital buffer should gradually increase from 1% to 1.5% effective from June 30, 2022, to 2.0% effective from December 31, 2022, and to 2.5% with effect from March 31, 2023. In September 2022, the Central Bank decided that this decision should be kept.

Supervisory Review and Evaluation Process

In September 2022, the Financial Supervisory Authority of Norway issued a new circular on its supervisory review and evaluation process (SREP).

Responsible banking

The new Norwegian Transparency Act entered into force 1 July 2022.

Strategic priorities to stay in the lead

THE BANKING SECTOR LANDSCAPE

As society returns to a new normal, the macroeconomic landscape has shifted. Loose monetary policy, accommodative fiscal policy, and other temporary governmental policies have begun to unwind, impacting core macroeconomic indicators – most notably, inflation. The global economy is experiencing heightened levels of inflation, exacerbated by the significant increase in energy prices. As a counter to inflation, central banks are steadfastly increasing interest rates to levels not seen in more than a decade. For most banks, the increase in interest rates is a welcome relief but comes with increased risk – as household and corporate finances are impacted by the accelerating cost of living, goods, and labor. Household finances are increasingly feeling the strain of increased “costs of living” fueled by inflationary effects.

On a relative basis, the Nordic region has held up well and remains an economically strong and stable region.

The continued trend of new banking sector entrants and other competitors targeting specific parts of the bank value chains is increasing competition and contestability within financial products and services. Whilst a threat, the advancements in technology and regulation does enable banks to develop new business and operational models that can leverage existing strengths to support future growth.

Corporate strategy

The Group's overarching commitment is to do business in a responsible and sustainable way. This is reinforced by the corporate purpose to help people and businesses prosper and underpinned by a value platform that ensures everything the Group does is simple, personal, and fair.

The Group has a clearly defined strategic ambition of being the leading Nordic consumer finance platform. This means striving to meet all customer and partner needs in a seamless and collaborative manner. The aim is to generate long-term, sustainable value creation for the Group's shareholder, Banco Santander. Within this context, the Group also strives to generate value for a broader group of stakeholders including employees, customers, partners, and society at large.

As part of the Group's corporate strategy, four long-term primary measures reflect the commitment to delivering long term stakeholder value.

- No. 1 customer and partner satisfaction in core markets.
- Employee satisfaction greater than 85%.
- Cost to income below 35%.
- RoRWA (Return on Risk Weighted Assets) greater than 2%.

To support and guide strategic execution in pursuit of these measures, the following three strategic pillars have been defined:

Grow selectively – Sustainable profitability at the core of existing and new business propositions.

Operate efficiently – Efficient, robust, and scalable operating model and resource allocation.

Work collaboratively – Organizational model underpinned by collaboration and engagement.

Strategic focus areas

During Q2 2022, the Group continued to operationalize and execute on its corporate strategy. Key areas of progress made include:

In light of the rapid upward development of interest rates announced by Central banks as a measure to curb inflationary pressures, the Bank has exercised considerable focus upon interest rate management and the pricing of its commercial offerings, balancing fair and affordable product pricing with delivering stakeholder's value under challenging market conditions.

As previously mentioned, acting responsibly and sustainably lies at the heart of the Group's corporate strategy. We are pleased to announce that the Group's inaugural Nordic Sustainability Report was published during Q2, outlining how the Group is supporting Grupo Santander's Responsible Banking ambitions and targets. The report was developed in alignment with the established international standards - Task Force on Climate Disclosures (TCFD) and the Global Reporting Initiative (GRI). The report is available on the Group's webpages.

Green Finance was identified as a key material topic within the Sustainability Report and a key strategic focus area for the Group. In Q3, the Group financed the purchase of 8945 new electric vehicles ("EVs"), representing 16% of all EVs purchased in the Nordic region during the quarter.

Furthermore, whilst not specifically deemed a green product offering, the Group launched its Energy+ loan product, geared towards helping customers finance home energy efficiency improvements.

1 | Notes

Santander Consumer Bank Nordic Group

Note 1 - Basis of preparation

The Group accounts include Santander Consumer Bank AS (the Bank), the Finnish subsidiary Santander Consumer Finance OY (SCF OY) and Special Purpose Vehicles ("SPV").

All figures and notes were prepared under the assumption that the business is a going concern.

The Groups interim accounts for the third quarter of 2022 have been prepared in accordance with IAS 34 Interim Financial Reporting, and should be read in conjunction with the Groups last annual report as at and for the year ended December 31, 2021.

The annual report for 2021 may be obtained by contacting Santander Consumer Bank AS, Strandveien 18, Lysaker – or by visiting www.santanderconsumer.no.

These interim financial statements were authorised by the Board of Directors on November 14, 2022.

Note 2 - Accounting principles

The accounting policies of the Group are consistent with those applied in the 2021 annual financial statements.

Note 3 - Credit risk exposure

All amounts in millions of NOK

Maximum exposure to credit risk - Financial instruments subject to impairment

The following table contains an analysis of the credit risk exposure of financial instruments for which an ECL allowance is recognised. The gross carrying amount of financial assets below also represents the Group's maximum exposure to credit risk on these assets.

Loans not past due date includes exposures that are not in arrears and not in default. Standard monitoring includes exposures in early arrears.

* Provisions related to off-balance credit exposures are recognized in the financial statement line other income and costs.

The Group does not have any engagements where no ECL provision has been made due to the value of the collateral.

Note 6 - Liquidity coverage ratio

Liquidity Coverage Ratio (LCR) measures the capability to meet obligations in the next 30 days by means of liquidity assets. It is defined as $LCR = \text{liquid assets} / \text{net liquidity outflows}$. The minimum LCR level (CRD IV) is 100% for SEK, DKK and EUR, and 50% for NOK. With a stable basis of High Quality Liquid Assets, the Group fulfills the minimum LCR requirements.

Liquidity Coverage Ratio (LCR) %	Q3 2022	Q3 2021	Q4 2021
Liquidity Coverage Ratio (LCR) Total	179%	194%	144%
Liquidity Coverage Ratio (LCR) NOK	106%	87%	77%
Liquidity Coverage Ratio (LCR) SEK	210%	170%	208%
Liquidity Coverage Ratio (LCR) DKK	207%	519%	201%
Liquidity Coverage Ratio (LCR) EUR	331%	165%	124%

From December 2015, the Group is calculating credit risk capital requirement using advanced internal rating based models (IRB- A models) for part of its exposures.

Since December 2018, the Group has reported capital ratios using IFRS9 transitional rules. From Q1 2022 and going forward, the Group will only report capital ratios under the fully loaded approach.

Financial information in accordance with the capital requirement regulation is published at www.santanderconsumer.no. The Pillar 3 Disclosure report is published at www.santanderconsumer.no.

Note 8 - Segment information

All amounts in millions of NOK

Financial management in the Group is oriented towards the various geographical markets. Monitoring of the overall profitability of the geographic areas are important dimensions of the strategic priorities and allocation of resources in the Group. Reported figures for the various segments reflect the Group's total sales of products and services in the geographical area.

Segment information is based on the internal financial reporting as it is reported to the Group management. The Group management uses the segment reporting as an element to assess historical and expected future development and allocation of resources. Reporting from the segments is based on the Group's governance model and the Group's accounting policies. The figures are based on a number of assumptions and estimates.

The Segments are responsible for profits after tax, with the corresponding return on allocated capital according to the Group's governance model. All the Group's trade activities are divided into the reported segments with corresponding balances, income and expenses. Deficit liquidity from the segments are funded by the Group treasury at market conditions. Surplus liquidity is transferred to the Group treasury at market conditions. Internal agreements at market conditions or simulated market conditions are made when segments cooperate on the delivery of financial services to customers. Services provided by the Group's central functions and staff are charged segments based on an allocation agreement.

Product segmentation per country (gross lending before expected losses)

Note 11 - Valuation Hierarchy

All amounts in millions of NOK

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Group has access to at that date. When available, the fair value of an instrument is measured using the quoted price in an active market for that instrument. If there is no quoted price in an active market, then the instruments fair value is measured using valuation techniques that maximize the use of relevant observable inputs and minimize the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction.

Level 1:
Instruments at this level obtain fair value from quoted prices in active markets for identical assets or liabilities that the entity has access by the reporting date. Examples of instruments at Level 1 are listed government bonds.

Level 2:
Instruments at this level is not considered to have an active market. Fair value is obtained from relevant observable market data. This includes prices based on identical instruments, as well as prices based on similar assets and price indicators that are observable for the asset or liability. Examples of instruments at Level 2 are securities priced out of interest rate paths. The fair value at level 2 is calculated by discounting future cash flows. The cash flows are known from contractual conditions, in addition to a marked regulated interest rate element (e.g. EURIBOR).

Level 3:
Instruments at Level 3 have no observable market inputs, or they traded on markets that are considered inactive. The price is based mainly on calculations based on internal data and the best information available given the circumstances.

2|Notes

Santander Consumer Bank AS

Note 1 - Basis of preparation

Santander Consumer Bank AS (the Bank) is a limited liability company incorporated in Norway. The interim financial statements show the activities of the Bank in Norway, Sweden and Denmark.

All figures and notes were prepared under the assumption that the business is a going concern.

The Banks interim accounts for the third quarter of 2022 have been prepared in accordance with IAS 34 Interim Financial Reporting, and should be read in conjunction with the Banks last annual report as at and for the year ended December 31, 2021.

The annual report for 2021 may be obtained by contacting Santander Consumer Bank AS, Strandveien 18, Lysaker – or by visiting www.santanderconsumer.no.

These interim financial statements were authorised by the Board of Directors on November 14, 2022.

Note 2 - Accounting principles

The accounting policies of the Bank are consistent with those applied in the 2021 annual financial statements.

Note 3 - Credit risk exposure

All amounts in millions of NOK

Maximum exposure to credit risk - Financial instruments subject to impairment

The following table contains an analysis of the credit risk exposure of financial instruments for which an ECL allowance is recognised. The gross carrying amount of financial assets below also represents the Bank's maximum exposure to credit risk on these assets.

Loans not past due date includes exposures that are not in arrears and not in default. Standard monitoring includes exposures in early arrears.

	Q3 2022				Q3 2021

* Provisions related to off-balance credit exposures are recognized in the financial statement line other income and costs.

The Bank does not have any engagements where no ECL provision has been made due to the value of the collateral.

Note 6 - Liquidity Coverage Ratio

Liquidity Coverage Ratio (LCR) measures the capability to meet obligations in the next 30 days by means of liquidity assets. It is defined as $LCR = \text{liquid assets} / \text{net liquidity outflows}$. The minimum LCR level (CRD IV) is 100% for SEK, DKK and EUR, and 50% for NOK. With a stable basis of High Quality Liquid Assets, the Bank fulfills the minimum LCR requirements.

Liquidity Coverage Ratio (LCR) %	Q3 2022	Q3 2021	Q4 2021
Liquidity Coverage Ratio (LCR) Total	163%	258%	189%
Liquidity Coverage Ratio (LCR) NOK	106%	87%	77%
Liquidity Coverage Ratio (LCR) SEK	215%	176%	212%
Liquidity Coverage Ratio (LCR) DKK	207%	519%	201%
Liquidity Coverage Ratio (LCR) EUR	201%	9770%	169%

From December 2015, the Bank is calculating credit risk capital requirement using advanced internal rating based models (IRB- A models) for part of its exposures.

Since December 2018, the Bank has reported capital ratios using IFRS9 transitional rules. From Q1 2022 and going forward, the Bank will only report capital ratios under the fully loaded approach.

Financial information in accordance with the capital requirement regulation is published at www.santanderconsumer.no. The Pillar 3 Disclosure report is published at www.santanderconsumer.no.

Note 8 - Segment information

All amounts in millions of NOK

Financial management in the Bank is oriented towards the various geographical markets. Monitoring of the overall profitability of the geographic areas are important dimensions of the strategic priorities and allocation of resources in the Bank. Reported figures for the various segments reflect the Bank's total sales of products and services in the geographical area.

Segment information is based on the internal financial reporting as it is reported to the Bank management. The Bank management uses the segment reporting as an element to assess historical and expected future development and allocation of resources. Reporting from the segments is based on the Bank's governance model and the Bank's accounting policies. The figures are based on a number of assumptions and estimates.

The Segments are responsible for profits after tax, with the corresponding return on allocated capital according to the Bank's governance model. All the Bank's trade activities are divided into the reported segments with corresponding balances, income and expenses. Deficit liquidity from the segments are funded by the Bank treasury at market conditions. Surplus liquidity is transferred to the Bank treasury at market conditions. Internal agreements at market conditions or simulated market conditions are made when segments cooperate on the delivery of financial services to customers. Services provided by the Bank's central functions and staff are charged segments based on an allocation agreement.

Product segmentation per country (gross lending before expected losses)

Note 11 - Valuation Hierarchy

All amounts in millions of NOK

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Group has access to at that date. When available, the fair value of an instrument is measured using the quoted price in an active market for that instrument. If there is no quoted price in an active market, then the instruments fair value is measured using valuation techniques that maximize the use of relevant observable inputs and minimize the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction.

Level 1:

Instruments at this level obtain fair value from quoted prices in active markets for identical assets or liabilities that the entity has access by the reporting date. Examples of instruments at Level 1 are listed government bonds.

Level 2:

Instruments at this level is not considered to have an active market. Fair value is obtained from relevant observable market data. This includes prices based on identical instruments, as well as prices based on similar assets and price indicators that are observable for the asset or liability. Examples of instruments at Level 2 are securities priced out of interest rate paths. The fair value at level 2 is calculated by discounting future cash flows. The cash flows are known from contractual conditions, in addition to a marked regulated interest rate element (e.g. EURIBOR).

Level 3:

Instruments at Level 3 have no observable market inputs, or they traded on markets that are considered inactive. The price is based mainly on calculations based on internal data and the best information available given the circumstances.

The interest rate on intercompany loans are carried out on market terms.

Financial information in accordance with the capital requirement regulation is published at www.santanderconsumer.no

Note 16 - Transactions with related parties

All amounts in millions of NOK

The Bank is controlled by Santander Consumer Finance S.A. which owns 100% of the company's shares. The Bank's ultimate parent is Grupo Santander. All companies within Grupo Santander are considered to be related parties. In addition, the SPVs (securitization of car loans) are also considered to be related parties.

Transactions with related parties are mostly interest expenses on funding from the parent company and the ultimate parent company. The Bank has transactions with the SPVs through funding and cash flows as agreed in the securitization process.

The following transactions were carried out with related parties:

	Q3 2022	Q3 2021	YTD Q3 2022	YTD Q3 2021	FY 2021
