

Santander Consumer Bank AS

Key Rating Drivers

Shareholder Support Drives IDRs: Santander Consumer Bank AS's (SCB) Issuer Default Ratings (IDRs) are equalised with those of its ultimate parent, Banco Santander, S.A. (Santander; A+/Stable) as Fitch Ratings believes there is a very high probability that SCB would be supported directly by Santander, or indirectly by its intermediate parent and 100% shareholder, Open Bank, SA (A+/Stable). This is captured in SCB's 'a+' Shareholder Support Rating (SSR). SCB's IDRs are aligned with those of the parent because it benefits from the group's resolution debt buffer and the downstreaming of the internal buffer that protects its external creditors. The Stable Outlook on SCB's Long-Term IDR mirrors that on its parent.

The rating equalisation also reflects the huge reputational risks that a default by SCB would represent for its Spanish parent, given their shared branding and SCB's inclusion in the parent's resolution group. The rating also considers Santander's strong ability to provide support, given SCB's modest size relative to the group.

Strong Alignment with Group Strategy: SCB's activities in the Nordic region have strong strategic alignment with its parent, as car and unsecured consumer financing are core businesses for the Santander group. We expect SCB to continue benefiting from group integration through funding costs, economies of scale and transfer of management expertise.

Strong Intrinsic Creditworthiness: SCB's Viability Rating (VR) reflects its leading Nordic consumer-finance franchise, underpinned by a clear and consistent business model, moderate risk appetite in auto and unsecured lending, and strong financial metrics.

Leading Nordic Auto Lender: SCB is a leading Nordic consumer finance bank, with strong market shares and relationships in the four main Nordic countries. It is particularly strong in auto finance, where it benefits from being part of Open Bank, particularly through globally arranged captive agreements, branding and strategic partnerships.

Well-Controlled Credit Risk: SCB operates within the inherently riskier consumer lending segment, but its underwriting standards are sound. This is underpinned by a dominant share of collateralised auto lending (about 90% of loans) and the generally sound repayment capacity of borrowers in the Nordic countries.

Downside Asset Risks Remain: The impaired loans ratio decreased to 2.6% at end-March 2026 (end-2024: 3.2%), supported by generally strong labour markets and gradually less restrictive monetary conditions. However, asset quality may come under some pressure from the uncertain outlook in the auto sector and the challenging geopolitical landscape.

Solid Earnings Generation: SCB's healthy and resilient pre-impairment profitability is underpinned by strong margins and robust cost efficiency, providing adequate loss-absorption capacity for its concentration on consumer finance. We forecast SCB's operating profit at 2.5% of risk-weighted assets (RWAs) in 2026.

Sound Capitalisation: SCB's common equity Tier 1 ratio (CET1; end-March 2026: 18.7%) and Basel leverage ratio (12.3%) compare favourably with those of similarly rated peers. Fitch expects higher payout ratios of annual earnings once macroeconomic uncertainties reduce, but for SCB's CET1 ratio to remain comfortably above its minimum requirements.

Stable Funding Profile: SCB has a less developed deposit franchise than higher-rated large Nordic banks, resulting in a loan-to-deposits ratio of 187% at end-March 2026. Deposits are the main source of funding, complemented by good access to wholesale funding and ordinary support from the Santander group.

Rating Sensitivities

Factors that Could, Individually or Collectively, Lead to Negative Rating Action/Downgrade

SCB's long-Term IDR and SSR would be downgraded if Santander's Long-Term IDR was downgraded. They could also be downgraded if Fitch expects a weakening in Santander's propensity to support SCB. This could result from SCB becoming less strategically important for the group or if it becomes significantly less integrated within the group, which Fitch does not expect.

The bank's VR has robust rating headroom. It could be downgraded if SCB's financial profile materially weakens. This would require a sustained contraction of its operating profit/RWAs and CET1 ratios to below 1.5% and 15%, respectively, combined with impaired loans and loan impairment charges (LICs)/gross loans ratios increasing above 4% and 1%, respectively, on a sustained basis.

Factors that Could, Individually or Collectively, Lead to Positive Rating Action/Upgrade

SCB's IDRs and SSR would be upgraded if Santander's Long-Term IDR was upgraded.

An upgrade of SCB's VR is currently unlikely owing to its business profile and concentrated business model.

Other Debt and Issuer Ratings

Rating Level	Rating
Deposits	A+/F1
Senior preferred	A+/F1
Source: Fitch Ratings	

SCB's long-term deposit and senior preferred debt (senior unsecured under Fitch's *Bank Rating Criteria*) ratings of 'A+' reflect the benefits from the group's resolution debt buffer, which underpins its SSR and IDRs. SCB's Short-Term IDR and its short-term deposit and senior preferred debt ratings of 'F1' are in line with the Short-Term IDR of Santander.

 Negative

VR - Adjustments to Key Rating Drivers

The VR of 'bbb+' is below the 'a-' implied VR due to the following adjustment reason: business profile (negative).

The capitalisation & leverage score of 'a-' is below the 'aa' category implied score due to the following adjustment reasons: historical and future metrics (negative), and risk profile and business model (negative).

The funding & liquidity score of 'bbb' is above the 'bb' category implied score due to the following adjustment reasons: liquidity access and ordinary support (positive), and non-deposit funding (positive).

Company Summary and Key Qualitative Factors

Business Profile

Auto finance is the bank's core product, accounting for about 90% of loans. It is mainly distributed through relationships with auto manufacturers, dealers, and importers, and, to a lesser extent, through direct marketing and the bank's own website. Unsecured lending makes up the remainder of the loans and consists of consumer loans and sales finance. It is sourced mainly through the internet and through business partners, with sales finance especially benefitting from online retail distribution and agreements with retailers and merchants.

Revenue almost solely consists of net interest income. SCB has some pricing power in its four markets and benefits from the high perceived quality of the Santander brand compared with many peers. Other benefits include efficiency advantages from technology and product-development synergies.

The bank's strategy is closely aligned with that of Open Bank and Santander. The bank wants to maintain its position in auto finance in the Nordic region. SCB's senior management has a clear strategic vision and a good degree of depth. It has also demonstrated an ability to both integrate acquired businesses and grow organically, while maintaining its prudent risk appetite. Management quality and execution benefit from integration with Santander in terms of corporate culture and governance.

SCB's ultimate parent, Santander, completed the merger of Santander Consumer Finance, S.A. and Openbank into a single legal entity, with operations gradually transitioning to the Openbank brand across European consumer finance businesses. The merger aims to simplify the business structure under a single consolidated operating platform and legal structure, and simultaneously broaden the product range. Germany will be the first market to initiate the brand integration. The timeline for other markets, including SCB, has not yet been communicated but we do not expect the business model of SCB to be affected in the near-term.

Performance Through the Cycle

* Annualised

Loan Split by Geography (%)

Source: FitchRatings, FitchSolutions, SCB AS

Risk Profile

We believe SCB's risk-management policies and procedures are good and appropriate given its business model, being closely integrated with those of the wider Santander group. This includes limits on credit, market and liquidity risk exposures, and operational, compliance and IT risks.

We expect the product split between auto (end-March 2026: 89%) and unsecured (11%) financing will remain broadly stable over the next few years. We believe credit standards are largely consistent but may vary slightly over economic cycles. The loan approval process is largely automated for auto and unsecured loans, with a generally stable level of acceptance. Auto financing mostly comprises loans to private individuals, followed by SMEs (fleet financing and wholesale financing). SCB's portfolio is fairly granular, being predominantly retail, which reduces borrower concentration. Loans are well-diversified geographically.

SCB's loan growth has fluctuated in recent years due to foreign-exchange-rate movements, acquisitions, tightened lending standards for unsecured loans, and shifting demand for auto financing. SCB's annual credit volume generation is high and should be viewed in light of a short effective loan maturity – about two years for auto loans. However, the fast loan book turnover is well controlled and balance sheet growth in recent years has been comfortably matched by capital generation.

Financial Profile

Asset Quality

Asset quality was resilient over the credit cycle, due to SCB's prudent risk appetite, well-balanced geographical mix, strong risk controls and adequate risk-based pricing. We expect recovering economic growth in 2026 to underpin most borrowers' repayment capacity, but expect the impaired loans ratio to increase slightly, as some specific counterparties in the auto sector face a still-challenging operating environment. The ratio should however remain below 3%. We expect the cost of risk to be around the historical average in 2026. This is because a high proportion of SCB's loan book is secured and the bank's tightened debt affordability assessment has increased the resilience of unsecured loan exposures.

The operating environment for auto dealerships will remain challenging in 2026, but easing monetary policy should alleviate pressure and we expect the Nordic labour markets to remain fairly resilient. The impaired loans/gross loans ratio was materially lower for auto loans at 1.7% at end-March 2026 compared with 10.1% for unsecured lending. Impaired loans are comfortably covered by specific loan loss allowances (end-March 2026: 57%).

SCB's pre-impairment operating profit has been sufficient over the past five years to absorb LICs equivalent to about 250bp of average gross loans annually, while the highest credit risk cost in the past decade was 110bp in 2020.

Impaired Loans/Gross Loans

P&L Loss Absorption Capacity

* Pre-impairment operating profit/average loans
Source: Fitch Ratings, Fitch Solutions, banks

Earnings and Profitability

SCB's strong profitability throughout the credit cycle reflects its low cost base, sound interest margins and contained LICs. The net interest margin was broadly stable in 2025 at 3.8%, and the ratio net of loan impairment charges remained strong at 3.2% (2024: 2.8%). Net interest income decreased by 3.5% in 2025, primarily reflecting structural changes in portfolio composition following the divestment of the higher-yielding credit card portfolio at end-2024, lower lending volumes in selected portfolios, and declining market rates.

Cost efficiency is robust despite SCB's small size. The bank plans to improve its cost/income ratio to below 35% through disciplined operating expense management, assisted by digitalisation. However, we believe limited income growth prospects make reaching this target unlikely in the medium term.

Capitalisation and Leverage

SCB's capitalisation is sound for the rating level and the business model. At end-March 2026, the fully loaded CET1 capital ratio was about 470bp above the requirement and the leverage ratio a high 12.3% due to the bank's high RWA density. SCB applies the standardised method for calculating capital requirements for auto loans for private customers in Denmark and all unsecured lending.

The bank primarily issues senior resolution debt (senior non-preferred) to its parent company, Open Bank to meet its minimum requirements for own funds and eligible liabilities.

Operating Profit/Risk-Weighted Assets

Source: Fitch Ratings, Fitch Solutions, banks

CET1 Ratio

Source: Fitch Ratings, Fitch Solutions, banks

Funding and Liquidity

SCB has increased its deposit base in recent years, in line with the group’s strategy to have self-funded subsidiaries. SCB has a deposit license in Norway, Sweden and Denmark. SCB’s deposits are more price- and confidence-sensitive than those of larger Nordic banking groups as its customers generally do not have other products with SCB, and the bank mainly competes on price.

The bank’s self-funding ratio stood at 84% at end-2025 on a senior liabilities’ basis. We expect SCB to decrease its reliance on parent bank funding over the next three years, predominantly by growing customer deposits. SCB also funds itself via securitisations and, in particular, unsecured debt. The use of secured funding is low (about 7% of funding at end-2025). However, following the recent adoption of new securitisation legislation in Norway, we expect the bank to resume increasing its asset-backed securities issuance.

SCB has a smaller portion of liquid assets than most peers, at about 7% of total assets at end-2025, but this equalled about 25% when including undrawn multicurrency committed facilities from the parent. We believe the bank would receive liquidity support from the parent if access to wholesale funding markets was uncertain or prohibitively expensive.

Additional Notes on Charts

Black dashed lines represent boundaries for indicative quantitative ranges and implied scores for Fitch’s core financial metrics for banks operating in the environments that Fitch scores in the ‘aa’ category. Peer average includes Corner Banca SA (VR: bbb+), Openbank Deutschland AG (bbb+) and Open Bank, SA (a-). Latest data available for Corner Banca SA, Openbank Deutschland AG and Open Bank, SA is for FY25. Unless otherwise stated, financial year (FY) end is 31 December for all banks in this report.

We consider SCB a key and integral part of Santander's consumer-finance activities. SCB operates in one of Open Bank's core geographies, and Santander considers Open Bank one of its core segments. Any required support for SCB would be immaterial relative to Santander's ability to provide it due to SCB's modest size.

SCB is highly integrated into the Santander group and has received ordinary support in the form of funding and capital from its parent to support business growth. SCB's management and corporate culture are highly integrated into Open Bank, and, ultimately, into Santander's. SCB also benefits from shared risk-management practices within the group and operates under the Santander brand name.

Climate Vulnerability Considerations

Fitch uses Climate Vulnerability Signals (Climate.VS) as a screening tool to identify issuers whose credit profiles have a higher potential exposure to climate-related risks, and to subject those ratings to additional analysis and consideration in rating reviews. Climate.VS range from 0 (lowest risk) to 100 (highest risk).

The Climate.VS for SCB for 2035 is 32. This indicates that climate risk factors are not expected to materially affect the credit profile, but some adaptation may be needed. This reflects a physical risk (VSp) component signal of 18 and a transition risk (VSt) component signal of 28. Any potential effect on the rating may differ from the illustrative rating impact in the Climate.VS framework. For more information on Climate.VS, see Fitch's [Bank Rating Criteria](#).

ESG Scoring

ESG relevance scores range from '1' to '5' based on a 15-level colour gradation. Red (5) is most relevant to the credit rating and green (1) is least relevant.

The Environmental (E), Social (S) and Governance (G) tables break out the general and the sector-specific issues that are most relevant to each industry group. Relevance scores are assigned to each sector-specific issue, signalling the credit relevance of the sector-specific issues to an issuer's overall credit rating. The Reference column highlights the factor(s) within which the corresponding ESG issues are captured in Fitch's credit analysis.

The panels underneath the relevance scores tables are visualisations of the frequency of occurrence of the highest ESG relevance scores across the combined E, S and G categories. The Score columns summarise rating relevance and impact to credit from ESG issues. The column on the far left identifies any ESG relevance sub-factor issues that are drivers or potential drivers of an issuer's credit rating (corresponding with scores of '3', '4' or '5'). All scores of '4' and '5' are assumed to reflect a negative impact unless indicated with a '+' sign for positive impact.

Classification of ESG issues has been developed from Fitch's sector ratings criteria. The general and sector-specific issues draw on the classification standards published by the UN Principles for Responsible Investing, the Sustainability Accounting Standards Board and the World Bank.

Credit-Relevant ESG Scale

5	Highly relevant, a key rating driver that has a significant impact on the rating on an individual basis. Equivalent to 'Higher' relative importance within the Navigator.
4	Relevant to rating, not a key rating driver but has an impact on the rating in combination with other factors. Equivalent to 'Moderate' relative importance within the Navigator.
3	Minimally relevant to rating, either very low impact or actively managed in a way that results in no impact on the entity rating. Equivalent to 'Lower' relative importance within the Navigator.
2	Irrelevant to the entity rating but relevant to the sector.
1	Irrelevant to the entity rating and irrelevant to the sector.

The highest level of ESG credit relevance is a score of '3', unless otherwise disclosed in this section. A score of '3' means ESG issues are credit neutral or have only a minimal credit impact on the entity, either due to their nature or the way in which they are being managed by the entity. Fitch's ESG Relevance Scores are not inputs in the rating process; they are an observation on the relevance and materiality of ESG factors in the rating decision. For more information on Fitch's ESG Relevance Scores, visit <https://www.fitchratings.com/topics/esg/products#esg-relevance-scores>.

FORECAST DISCLAIMER FOR FINANCIAL INSTITUTIONS

Any forecast(s) in this report reflect Fitch's forward view on the issuer's financial metrics. They are constructed using a proprietary internal forecasting tool and based on a combination of Fitch's own performance assumptions, macroeconomic forecasts, sector-level outlook and issuer-specific considerations. As a result, Fitch's forecasts may differ materially from the rated entity's forecasts or guidance and may not reflect the assumptions that other market participants may make. To the extent Fitch is aware of material non-public information with respect to future events, such as planned recapitalisations or merger and acquisition activity, Fitch may not reflect these non-public future events in its published forecasts. However, where relevant, such information is considered by Fitch as part of the rating process.

Fitch may update the forecasts in future reports but assumes no responsibility to do so. Original financial statement data for historical periods may be processed by affiliates of Fitch, together with certain outsourcing services. Key financial adjustments and all financial forecasts credited to Fitch Ratings are generated by its employees.

Fitch's forecasts are one component used by the agency to assign a rating or determine an Outlook. The information in the forecasts reflects material but not exhaustive elements of Fitch's rating assumptions for the issuer's financial performance. It cannot be used to establish a rating, and it should not be relied on for that purpose.

DISCLAIMER & DISCLOSURES

All Fitch Ratings (Fitch) credit ratings are subject to certain limitations and disclaimers. Please read these limitations and disclaimers by following this link: <https://www.fitchratings.com/understandingcreditratings>. In addition, the following <https://www.fitchratings.com/rating-definitions-document> details Fitch's rating definitions for each rating scale and rating categories, including definitions relating to default. Published ratings, criteria, and methodologies are available from this site at all times. Fitch's code of conduct, confidentiality, conflicts of interest, affiliate firewall, compliance, and other relevant policies and procedures are also available from the Code of Conduct section of this site. Directors and shareholders' relevant interests are available at <https://www.fitchratings.com/site/regulatory>. Fitch may have provided another permissible or ancillary service to the rated entity or its related third parties. Details of permissible or ancillary service(s) for which the lead analyst is based in an ESMA- or FCA-registered Fitch Ratings company (or branch of such a company) can be found on the entity summary page for this issuer on the Fitch Ratings website.

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed. Fitch Ratings makes routine, commonly-accepted adjustments to reported financial data in accordance with the relevant criteria and/or industry standards to provide financial metric consistency for entities in the same sector or asset class.

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001.

Fitch Ratings, Inc. is registered with the U.S. Securities and Exchange Commission as a Nationally Recognized Statistical Rating Organization (the "NRSRO"). While certain of the NRSRO's credit rating subsidiaries are listed on Item 3 of Form NRSRO and as such are authorized to issue credit ratings on behalf of the NRSRO (see <https://www.fitchratings.com/site/regulatory>), other credit rating subsidiaries are not listed on Form NRSRO (the "non-NRSROs") and therefore credit ratings issued by those subsidiaries are not issued on behalf of the NRSRO. However, non-NRSRO personnel may participate in determining credit ratings issued by or on behalf of the NRSRO.
